

MEMORANDUM

VSP WATERSHED WORK GROUP

June 27th, 2023

Mason Conservation District
450 West Business Park Road * Shelton, WA

This signed memorandum is to show the Mason VSP workgroup provides its majority support for acquiring a no-till drill by Mason Conservation District in collaboration with Mason County Tractor Club.

The Mason VSP workgroup has discussed in multiple meetings the need for a community available no-till seed drill. The Mason VSP workplan, adaptive management and goals are further supported by no-till equipment. Each use by the community members in Mason County is a voluntary implementation of NRCS recognized best management practice that can directly protect or enhance the functions and values of critical areas in Mason County.

Larry Boltz, Chair, Mason VSP Workgroup
